

Corporations now are allowed to own and control too many newspapers and television and radio stations. Please do not allow them any more. We have to end the concentration of our media in the hands of a few corporations. The system is becoming too homogenized and there is little diversity or discussion of opposite opinions. There was supposed to be more local low wattage TV and radio stations but that hasn't even happened. Please do not loosen the limits on how many newspapers and broadcast stations a firm can own.
